original text

COVID related closures threaten to reverse progress aimed at keeping children in school. Before the pandemic, 17% of children and youth globally were out of primary and secondary school, compared to 26% in 2000. By April

2020, 1.6 billion children were out of school. An estimated 147 million more than missed in person half of in person instruction over past two years. As a result this generation could lose combined total of \$17 million in lifetime earnings.

MOST FREQUENT WORDS

Goal 3.1
Maternal Mortality

[search word]

Preventable High Childbirth Inequalities

Low Income Developed Low Infections Abortion

Education Poverty

when you click words their contexts will appear below including when you search a word

1. Why do women die?

- severe bleeding
- infections
- unsafe abortion

2. To avoid maternal deaths, it is also vital to prevent unwanted pregnancies. All women, including adolescents, need access to contraception, safe abortion services to the full extent of the law, and quality post-abortion care.
